Index

Volume 26, 1978

Articles *(by title)*

Age and directed-participation variables influencing the effectiveness of televised instruction in concrete operational behaviors, Ronald W. Henderson and Rosemary A. Swanson, 26: 4 301 – 312

Arousal and cognition: The stimulation-seeking motive and structural effects in the comprehension of film, Marc T. Braverman and Frank H. Farley, 26: 4 321 – 327

Change in education and the future role of the educational communications consultant, Stephen T. Kerr, 26: 2 153 – 164

Cognitive styles: Some information and implications for instructional design, Lynna J. Ausburn and Floyd B. Ausburn, 26: 4 337 – 354

Communication research and instructional technology, Harold E. Hill, 26: 1 47 – 54

Computer-based education: Research, theory, and development, Keith A. Hall, 26: 1 79 – 93

Cultural conventions of pictorial representation: Iconic literacy and education, James Mangan, 26: 3 245 – 267

Doctoral research training in educational technology, Richard E. Clark, 26: 2 165 – 173

Education, technology, and individual privacy, Lawrence P. Grayson, 26: 3 195 – 206

Educational technology—Adolescence to adulthood, Robert M. Morgan, 26: 2 142 – 152

Effect of film-mediated intensive instruction on basic problem-solving skills of ninth graders, Emmett L. Wright, 26: 3 207 – 214

Effects of presentation modes, explicitness, and student aptitudes on learning, Carol A. Carrier and Richard E. Clark, 26: 4 329 – 336

A factor analytic study of children's picture interpretation behavior, Leslie C. Higgins, 26: 3 215 – 232

Film research: The need for a new breed, Robert W. Wagner, 26: 1 65 – 78

From how to what to why: The search for educational utility, Roger Kaufman, 26: 2 107 – 121

Instructional development, Robert K. Branson, 26: 2 123 – 132

Instructional product verification and revision: 20 questions and 200 speculations, Sivasailam Thiagarajan, 26: 2 133 – 141

Is there a future for simulation and gaming research?, Don H. Coombs, 26: 2 99 – 106

Media, mental imagery, and memory, Robert L. Clark, 26: 4 355 – 363

On the future of media research: No more full acceleration in neutral gear, Gavriel Salomon, 26: 1 37 – 46

On pictures in prose, Joel R. Levin and Alan M. Lesgold, 26: 3 233 – 243

Our picture of mental imagery: Prospects for research and development, Frank W. Wicker, 26: 1 15 – 24

Perception theory: Does it make any difference?, Kenneth Norberg, 26: 1 5 – 13

Pictorial support and specific instructions as design variables for children's concept and rule learning, Robert D. Tennyson, 26: 4 291 – 299

Problems and needed directions in the profession of educational technology, Kenneth H. Silber, 26: 2 174 – 185

A prospectus for instructional research on visual literacy, W. Howard Levie, 26: 1 25 – 36

Research and the practitioner at the regional education service agency, Albert L. Goldberg and George H. Grimes, 26: 2 186 – 192

Responsiveness of Nigerian students to pictorial depth cues, G. S. Evans and G. M. Seddon, 26: 4 313 – 320

Television for learning: Future research opportunities, Mary Sceiford, 26: 1 55 – 63

Articles *(by author)*

Research Abstracts *(by title)*

Abstracts of papers presented at the April 1977 convention of the Association for Educational Communications and Technology, Research & Theory Division, Syracuse University, ERIC Clearinghouse on Information Resources, 26: 3 280

Academic gaming, Roger B. Fransecky and John Trojanski, 26: *1* 94

Children's television: The Best of ERIC, Richard E. Clark, 26: 4 376 – 377

Children's television workshop. Quarterly reports for January-March 1977 and April-June 1977, Children's television workshop, 26: 3 280

Comprehension: The challenge for children's television, Susan R. Storm, 26: 3 279 – 280

Compressed media: A new dimension of compressed speech, Raymond H. Hartjen, 26: 3 278 – 279

Computer-based adaptive instructional strategies for the improvement of performance and reduction of time, Robert D. Tennyson and Carol L. Tennyson, 26: *1* 95

Correlation of selected cognitive abilities and cognitive processing parameters: An exploratory study, Richard E. Snow and others, 26: 4 376

A cross-over experimental design for testing audiovisual training materials, Harold D. Stolovitch and Pierre Bordeleau, 26: 3 278

The economics of new educational media. Present status of research and trends. Educational methods and techniques 1, United Nations Educational, Scientific, and Cultural Organization, 26: 4 378

The effects of color realism on pictorial recognition memory, Louis H. Berry, 26: 4 378

Experimental simulation of "future shock" to explore time perspectives under different rates of change, Charles M. Plummer, 26: *1* 94

Film/television: A research guide. Factfile No. 11, Diana Elsas and others, 26: 4 377

Inquiry in development: Efficiency and effectiveness of algorithmic representations in a laboratory situation, William C. Coscarelli, 26: *1* 96

Instructional technology and media for post-secondary alternatives: Meeting California's educational needs, A feasibility study, Richard E. Clark and David P. Rubin, 26: 4 379

The language of media and the cultivation of mental skills. A report on three years of research submitted to the Spencer Foundation, Gavriel Salomon, 26: 4 378 – 379

Measurement of science processes in intermediate grades through instructional television, David Torrence, 26: 3 279

Pictorial research in 1976, W. Howard Levie, 26: 3 278

A regression model for selection of games to enhance problem solving and personality skills in young children, Beth T. Kennedy and John McGinty, 26: *1* 95 – 96

The relationship of children's television viewing to achievement at the intermediate level, Nancy I. Quisenberry and Charles B. Klasek, 26: 3 279

Reliability and validity of a new television test of science processes, David Torrence, 26: 3 279

The role of pictures in first grade children's

perception of mathematical relationships, Patricia F. Campbell, 26: 4 377

A summary of research in personalized, individualized, and self-paced instruction in college economics, George G. Dawson, 26: 4 377 – 378
